## **GUJARAT TECHNOLOGICAL UNIVERSITY**

**BE- SEMESTER-VII EXAMINATION – WINTER 2025**

**Subject Code:3170615**

**Date:26-11-2025**

**Subject Name: Engineering Economics, Estimation and Costing**

**Time:10:30 AM TO 01:00 PM**

**Total Marks:70**

**Instructions:**

1. Attempt all questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.
4. Simple and non-programmable scientific calculators are allowed.

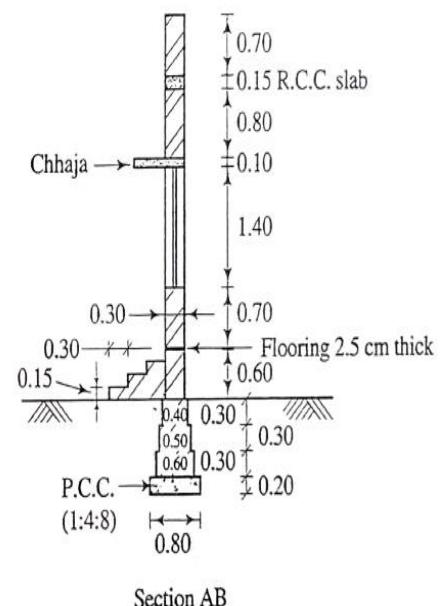

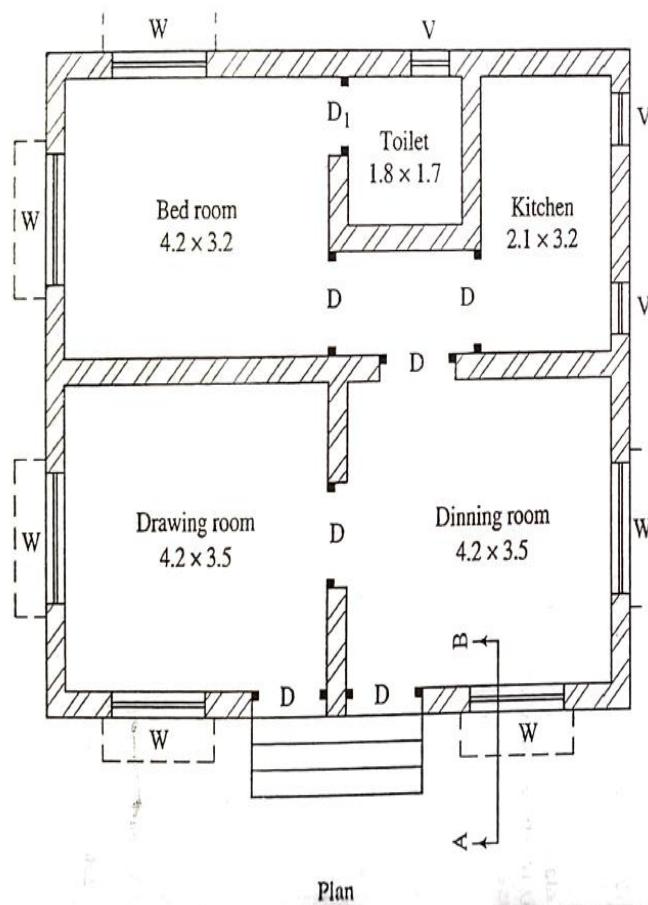

|            |  | <b>MARKS</b>                            |
|------------|--|---|
| <b>Q.1</b> | (a) Define provisional quantities, day work and contingencies<br>(b) Define depreciation and explain its methods in brief.<br>(c) Estimate the quantities by centre line method of following items of building given in Fig.1<br>1) Earthwork in excavation and filling in foundation trench<br>2) Plain Cement Concrete in foundation<br>3) First class brick work in 1:6 cement mortar in foundation and plinth<br>4) Brickwork above plinth level | <b>03</b><br><b>04</b><br><b>07</b>     |
| <b>Q.2</b> | (a) Discuss breakeven point.<br>(b) Give a brief idea of a) Marginal Cost, b) Sunk Cost<br>(c) Discuss the difference in evaluating alternatives of private and public organizations.  | <b>03</b><br><b>04</b><br><b>07</b>     |
|            | <b>OR</b>  |   |
|            | (c) State the law of supply and demand. Draw supply – demand curve. Give brief idea about factors influencing demand and supply.   | <b>07</b>                               |
| <b>Q.3</b> | (a) Write down the essential principle of good specification writing.<br>(b) Write down a detailed specification for external plaster work in 1:8 CM.<br>(c) Explain following in brief: a) Earnest Money Deposit b) Liquidated Damage c) Security deposit   | <b>03</b><br><b>04</b><br><b>07</b>     |
|            | <b>OR</b>  |   |
| <b>Q.3</b> | (a) Mention the factors affect the analysis of rates.<br>(b) Write detailed specification for RCC work of floor slab having proportion of 1:1.5:3<br>(c) Describe in detail the process of a scrutiny of tender  | <b>03</b><br><b>04</b><br><b>07</b>     |
| <b>Q.4</b> | (a) Define rate analysis. Give a brief idea of SOR<br>(b) Carry out the rate analysis of 12 mm thick wall plaster work in 1:3 C:M<br>(c) Draft a detailed tender notice for the construction of new academic building at Engineering College which estimated cost is Rs.40 cr.   | <b>03</b><br><b>04</b><br><b>07</b>     |
|            | <b>OR</b>  |   |
| <b>Q.4</b> | (a) Give the rate of a) Brick b) Marble c) Steel d) Granite e) Cement f) sand<br><br>(b) Carry out the rate analysis of 1 <sup>st</sup> class brickwork in 1:4 C:M<br>(c) Explain item rate contract and cost plus percentage contract in detail.  | <b>03</b><br><br><b>04</b><br><b>07</b> |

**Q.5** (a) Give the difference between Estimation and Valuation **03**  
 (b) Explain the purpose of valuation. **04**  
 (c) A property may fetch a net annual income of Rs. 51000/- for next 30 years. Landlord expects a net return of 9% on his /her capital and the sinking fund value for the replacement of capital = 8%. Calculate the value of the property if ROI to redeem the property is 4%

**OR**

**Q.5** (a) Define: i) Sinking Fund, ii) Distress value, iii) Scrap value **03**  
 (b) Explain different types of outgoings. **04**  
 (c) The present value of a property is Rs. 330000/- out of which land cost Rs. 80,000/-. The owner expects 8% return on the construction cost and 5% return on land cost. Future life of building is 75 years. At the end of useful life, Rs. 400000/- will be required to replace construction cost. Assume sinking fund interest 5%, repair charges 1% of cost of construction. All other outgoings are 25% of net annual income. Take scrap value 10% of present value. Calculate the monthly rent.
